

1.Introduction

Crystro can independently developed and produced Rotators and Isolators, which are made of our own produced TGG magneto-optical crystal, which is a key material of the device, so that can ensure the series products have the highest isolation, transmittance, laser damage threshold resistance and temperature application range.

2.Specifications:

Model No	CI-5-780-HP
中心波长Center Wavelength	780nm
可调范围Operating wavelength range	+/-10nm
偏光类型Polarizer Type	High Power (HP)
峰值透过Peak Transmission	>93%
M2降解M2 Degradation	<10%
通光孔径Clear Aperture	5mm
最大光束直径Max beam diameter	3.5mm
隔离度Isolation	≥35db
功率Optical Power(Average)	20W/50W(customized)
损伤阈值Damage Threshold	10J/cm ² @ 10ns
储存温度Storage Temperature Range	-20-70°C
工作温度Tunable Temperature Range	5-60°C

三、 Size (mm):
